# The HEALthy Brain and Child Development Study

The HBCD Study is the largest longitudinal study of early brain and child development in the United States. Knowledge gained from this research will have lasting impacts on future generations of children.

This ambitious project will enroll over 7,000 participating families from across the United States and follow them from pregnancy through early childhood. The HBCD Research Consortium consists of the HBCD Consortium Administrative Core (HCAC), the HBCD Data Coordinating Center (HDCC), and 27 recruitment sites across the country (see map).

Leading researchers in the fields of child development and neuroscience will work with participating families and their children to understand how the brain develops and how exposure to substances and other environmental, social, and biological factors during pregnancy and after birth impact outcomes.

## HBCD Open Science Model

The data generated in the study will be made broadly available to the research community through an open science model and serve as a resource to support numerous additional studies and foster new hypotheses to be explored.

### Locations of HBCD Recruitment Sites in the United States

**Recruitment Sites**

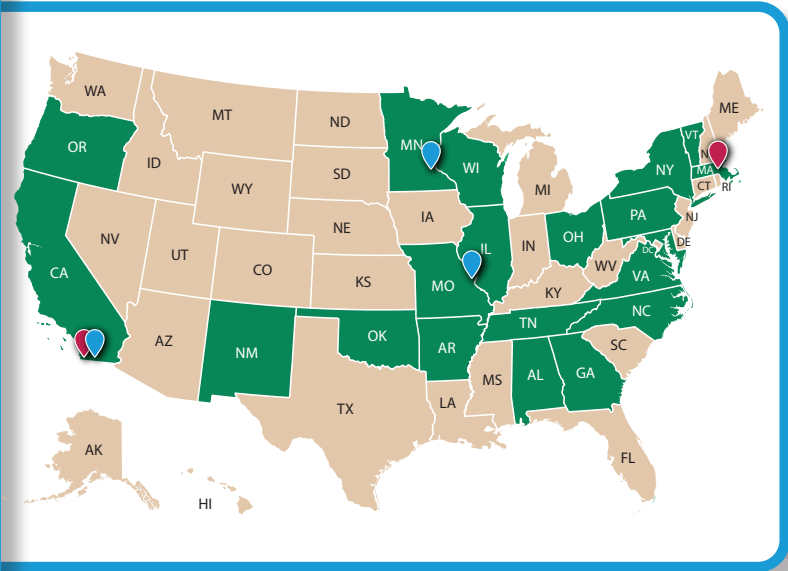

- Arkansas Children's Hospital Research Institute
- Boston Children's Hospital | Harvard Medical School
- Cedars-Sinai Medical Center
- Children's Hospital of Los Angeles
- Children's Hospital of Philadelphia
- Cincinnati Children's Hospital
- Emory University
- Johns Hopkins University/Kennedy Krieger Institute
- New York University School of Medicine
- Northwestern University
- Oklahoma State University Center for Health Sciences
- Oregon Health & Science University
- Pennsylvania State University-University Park
- Pennsylvania State University College of Medicine
- University of Alabama at Birmingham
- University of Alabama at Tuscaloosa
- University of Arkansas for Medical Sciences
- University of Maryland
- University of Minnesota
- University of New Mexico
- University of North Carolina Chapel Hill
- University of Vermont
- University of Wisconsin-Madison
- University of California, San Diego
- Vanderbilt University
- Virginia Tech
- Washington University

**HCAC**

- University of California San Diego
- Boston Children's Hospital | Harvard Medical School

**HDCC**

- University of California San Diego
- University of Minnesota
- Washington University

# 0–1 Month of Age

HBCD Measure	What it Measures	Child (min)	Adult (min)
<b>Adult Health</b>			
<b>American Psychiatric Association (APA) DSM-5 Level 1</b>	Current mental health symptoms, including depression, anxiety, sleep problems, memory, psychosis, personality functioning, etc.		2.5
<b>APA Patient-Reported Outcome Measurement Information System (PROMIS) Level 2</b>	More detailed assessment of current mental health symptoms, including anxiety, depression, anger, sleep disturbances, mania, obsessive-compulsive behaviors, and personality functioning		2.5
<b>DSM-5 Severity Scales - Acute Stress or Post-Traumatic Stress Disorder (PTSD)</b>	Severity of acute stress and PTSD symptoms		5
<b>Edinburgh Postnatal Depression Scale (EPDS)</b>	Symptoms of postnatal depression		3*
<b>Health History</b>	Most recent pregnancy health history, medication and other substance exposures, delivery and birth outcomes		30*
<b>Substance Use</b>			
<b>Substance Use Patterns</b>	Estimates of prenatal substance frequency use across pregnancy		3
<b>Alcohol, Smoking and Substance Involvement Screening Test (ASSIST)</b>	Lifetime and current substance use (end of pregnancy and since birth)		5*
<b>Timeline Followback (TLFB)</b>	Quantitative estimates of prenatal alcohol and substance use		20*
<b>Biospecimens</b>			
<b>Saliva</b>	Genome-wide association studies (GWAS), Epigenome-wide association studies (EWAS), transcriptomes	10	10*
<b>Stool</b>	Metabolome, microbiome	15	
<b>Urine</b>	Metabolites and environmental exposures	5	
<b>Nails</b>	Substance and environmental exposures		15*
<b>Social and Environmental Determinants</b>			
<b>Patient-Reported Outcome Measurement Information System (PROMIS) Social Support/ Perceived Stress</b>	Availability of social support and perceptions of stress during the past month		4
<b>Residential History for Geocoded Data Linkage</b>	Home, work, or other frequented addresses for linking to external datasets		5
<b>Transitions in Care</b>			
<b>Transitions in Care Screener</b>	Survey to assess whether there were changes in child's main caregiver since the last visit		3

Continued next page >

\*Measure to be completed by the birthing mom only.

# 0–1 Month of Age

HBCD Measure	What it Measures	Child (min)	Adult (min)
<b>Physical Health</b>			
<b>2-Item Food Insecurity Screen</b>	Household food insecurity		1
<b>Head Circumference, Height, Weight</b>	Child's physical growth	5	
<b>Health History</b>	Child's medication and environmental exposures		30
<b>Medical Record Extraction</b>	Child's diagnoses, vaccinations, developmental screens, medications, hospitalizations, surgeries, laboratory results		10
<b>PhenX Breastfeeding Questionnaire</b>	Whether the child was breastfed, breastfeeding duration, and introduction of solid foods		1
<b>Novel Technology/Wearables</b>			
<b>Activity Surveys</b>	Child activity levels and functioning of movement and heart rate sensors, assessed once daily for 72-96 hours		12
<b>Heart Rate Sensors</b>	Child heart rate, SpO2, and respiratory rate using LED sensors	72 hours, worn at home	5
<b>Movement Sensors</b>	Child movement and sleep/wake cycles using sensors with an accelerometer and gyroscope	72 hours, worn at home	5
<b>Brain Imaging</b>			
<b>Outside the Scanner</b>	Pre-Scan & Post-Scan Surveys: Sleep information, social behavior, transportation, scheduling, etc.		40
<b>Magnetic Resonance Imaging (MRI)</b>	Diffusion MRI	13	
	Functional MRI (resting state)	16	
	MR Spectroscopy	10	
	Quantitative MRI	4	
	Structural MRI (T1/T2)	10	
<b>Total Visit Time (min)</b>		<b>300</b>
